Paper Review

All published journal papers are refereed by the international competent researchers and scientists. Therefore, a full double-blind international refereeing process is used in which:

- Papers are sent to reviewers for their peer review process.
- The reviewers' recommendations determine whether a paper will be accepted / accepted subject to change / subject to resubmission with significant changes / rejected.

All papers are refereed, and the Editor-in-Chief reserves the right to refuse any typescript, whether on invitation or otherwise, and to make suggestions and/or modifications before publication.
