LEMBAR PENGESAHAN ................................................................. i
SURAT PERNYATAAN.................................................................ii
ABSTRAK ................................................................................... iii
ABSTRACT ................................................................................... iv
KATA PENGANTAR ..................................................................... v
DAFTAR ISI ................................................................................. vi
DAFTAR TABEL ............................................................................. vii
DAFTAR GAMBAR ....................................................................... viii

BAB I PENDAHULUAN ................................................................. I-1
1.1 Latar Belakang Masalah ......................................................... I-1
1.2 Rumusan Masalah ............................................................... I-2
1.3 Maksud dan Tujuan Penelitian ............................................ I-3
1.4 Batasan Masalah ................................................................. I-3
1.5 Metodologi ........................................................................... I-4
1.6 Sistematika Penulisan ......................................................... I-6

BAB II LANDASAN TEORI ......................................................... II-1
2.1 Pengertian Tumbuhan ......................................................... II-1
2.1.1 Tanah ............................................................................. II-1
2.1.2 Air .................................................................................. II-1
2.1.3 Kebutuhan Air Siraman.................................................. II-2
2.2 Interfacing System ............................................................. II-3
2.2.1 Mikrokontroler Arduino .................................................. II-4
2.2.2 Rancangan Skematik Microcontroller Arduino Mega 2560 ... II-4
2.2.3 Rancangan Skematik Arduino WiFi Shield ..................... II-5
2.2.4 Spesifikasi Soil Moisture Sensor ..................................... II-6
2.2.5 Sketsa Servo ................................................................. II-7
BAB III ANALISIS SISTEM

3.1 Prototype Pertama .............................................................. III-1
  3.1.1 Pentingnya menyiram tanaman secara kontinu dan terjadwal ........ III-2
    3.1.1.1 Faktor Penentu Laju Fotosintesis ........................................ III-2
    3.1.1.2 Tanaman di Tengah Aktifitas Manusia ................................... III-3
    3.1.1.3 Perawatan Tanaman Di Rumah ............................................ III-4
  3.1.2 Kelembapan Tanah ..................................................... III-6
    3.1.2.1 Proses Penyiraman yang Baik ............................................. III-6
    3.1.2.2 Alat Pengukur Kelembapan Tanah ...................................... III-7
  3.1.3 Proses Penyiraman Tanaman ......................................... III-7
    3.1.3.1 Sistem Monitor Tanaman .................................................... III-7
    3.1.3.2 Pengontrol Penyiraman Tanaman ....................................... III-8
    3.1.3.3 Menjadwalkan Penyiraman Secara Otomatis ......................... III-9
  3.1.4 Identifikasi Masalah .................................................. III-10
  3.1.5 Pemodelan Sistem yang Ada Saat Ini .............................. III-10
  3.1.6 Hasil Analisis Prototype Pertama .................................... III-11
  3.2 Prototype Kedua .......................................................... III-18
    3.2.1 Pentingnya Intensitas Waktu Penyiraman Pada Tanaman ............ III-19
3.2.1.2 Pengaruh Musim Terhadap Frekuensi Penyiraman ...................... III-20
3.2.1.3 Pentingnya Kadar Air yang Tepat Bagi Tanaman ....................... III-20
3.2.2 Diperlukannya Penerapan Internet dan Web Hosting ..................... III-21
3.2.2.1 Perlunya Jangkauan Akses yang Lebih Luas ........................... III-21
3.2.2.2 Perlunya Web Server Hosting Bagi Sistem .................................. III-23
3.2.3 Perlunya Akun Pengguna Untuk Mengakses Sistem ..................... III-23
3.2.4 Pendaftaran Akun Pengguna ....................................................... III-24
3.2.5 Hasil Analisis Prototype Kedua ................................................... III-24

BAB IV PERANCANGAN SISTEM ................................................. IV-1
4.1 Prototype Pertama ........................................................................ IV-1
4.1.1 Kajian Hasil Analisis Prototype Pertama .................................. IV-1
4.1.2 Pemodelan Sistem pada Prototype Pertama ............................... IV-3
4.1.2.1 Sketsa Gambaran Sistem Baru ................................................... IV-3
4.1.2.2 Use Case Diagram Prototype Pertama ..................................... IV-7
4.1.2.3 Definisi Use Case Diagram Prototype Pertama ....................... IV-8
4.1.2.4 Skenario Use Case Prototype Pertama .................................... IV-9
4.1.2.5 Class Diagram Tahap Analisis ................................................ IV-10
4.1.2.4 Sequence Diagram Prototype Pertama .................................. IV-12
4.1.2.5 Activity Diagram Prototype Pertama ..................................... IV-14
4.1.2.6 Class Diagram Prototype Pertama ......................................... IV-15
4.1.3 Perancangan Smart Home System Penyiraman Tanaman .......... IV-16
4.1.4 Perancangan Antarmuka Aplikasi Mobile Prototype Pertama .... IV-16
4.2 Prototype Kedua ........................................................................... IV-18
4.2.1 Kajian Hasil Analisis Prototype Kedua ................................... IV-18
4.2.2 Pemodelan Sistem Pada Prototype Kedua ............................... IV-20
4.2.2.1 Use Case Diagram Prototype Kedua ....................................... IV-20
4.2.2.2 Definisi Use Case Diagram Prototype Kedua ......................... IV-21
4.2.2.3 Skenario Use Case Prototype Kedua ....................................... IV-22
4.2.2.4 Class Diagram Tahap Analisis Prototype Kedua ..................... IV-26
4.2.2.5 Sequence Diagram Prototype Kedua ....................................... IV-27
4.2.2.6 Activity Diagram Prototype Kedua ......................................... IV-33
4.2.2.7 Class Diagram............................................................................... IV-32
4.2.3 Rancangan Diagram Mekanika Perangkat Penyiraman Tanaman......IV-34
4.2.4 Rancangan Diagram Kontroller Perangkat Penyiraman Tanaman......IV-35
4.2.5 Gambaran Umum Komunikasi Sistem dengan Web Server Hosting .IV-37
4.2.6 Perancangan Antarmuka Aplikasi Mobile Prototype Kedua...........IV-38

BAB V IMPLEMENTASI DAN PENGUJIAN SISTEM…………………V-1

5.1 Prototype Pertama ................................................................................... V-1

5.1.1 Konsep Komunikasi Perangkat Keras.................................................V-1

5.1.2 Implementasi Kontrol Keran Langsung ............................................... V-3

5.1.2.1 Implementasi Keran dengan Servo................................................. V-3

5.1.2.2 Implementasi Menu Global di Android............................................ V-5

5.1.2.3 Implementasi User Interface Keran di Android ......................... V-6

5.1.2.4 Implementasi Update Data Ke Database....................................... V-7

5.1.3 Implementasi Kontrol Berdasarkan Sensor .......................................... V-8

5.1.3.1 Implementasi Kontrol Triggering Berdasarkan Sensor ................... V-8

5.1.3.2 Implementasi Update Data Sensor Ke Database............................. V-9

5.1.4 Penguji...
5.2.3 Implementasi Akun Pengguna Untuk Mengakses Sistem ............... V-24
5.2.4 Implementasi Form Login Pengguna ........................................ V-25
5.2.5 Implementasi Form Registrasi Akun Pengguna ....................... V-26
5.2.6 Implementasi Database user ..................................................... V-27
5.2.7 Pengujian Prototype Kedua ...................................................... V-28
  5.2.7.1 Waktu Penjadwalan Penyiraman Pada Tanaman ............... V-28
  5.2.7.2 Pengujian Penggunaan Internet dan Web Hosting .......... V-30
  5.2.7.3 Pengujian Login Pengguna Untuk Mengakses Sistem ...... V-31
  5.2.8.4 Pengujian Pendaftaran Akun Pengguna ........................... V-32

BAB VI PENUTUP ................................................................. VI-1
  5.1 Kesimpulan ................................................................. VI-1
  5.2 Saran ................................................................. VI-2
